Aspiration: Giving Made Effortless

Matthew Day, Rakil Kim, Alan Lin, Austin Lo

UCLA

Motivation

Prospective donors wish to **give** to **causes they care about**, but **inconvenient** or **untrustworthy** experiences can lead to them **abandoning the process** before completing the donation.

Our goal is to **empower users to support causes they care about by making it simple and convenient to donate to charity.**

User Research

Based on 30 user research interviews

80% **Have donated at least once**

27% **Donate frequently/consistently**

63% **Cite financial reasons as a barrier from donating large amounts frequently**

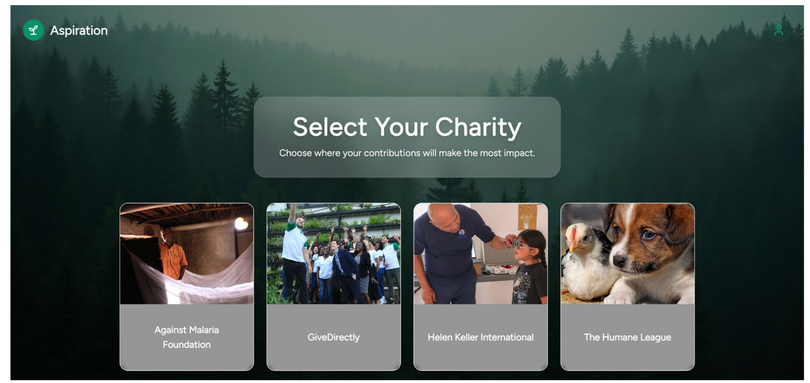
Insights

+ Most people have donated at least once
+ Very few people donate consistently
+ Donors want confidence in the charity and our app
+ Insufficient financial freedom for large donations

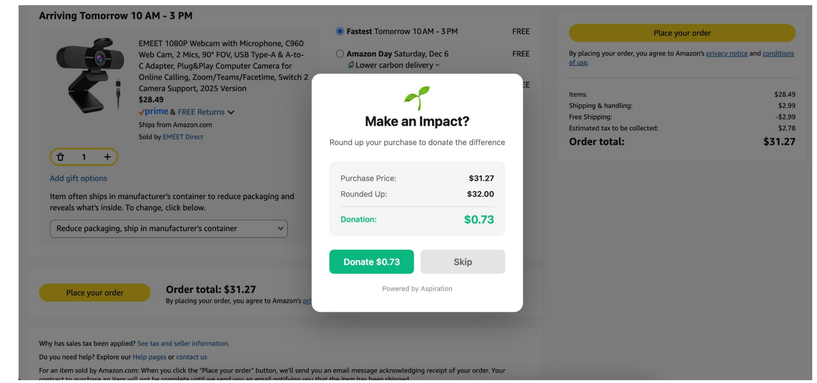
System Overview

Aspiration allows users to support charities of their choice in a cost-effective way by setting up **automatic round-up** on online purchases and donating the difference to charity. This enables users to conveniently make donations in small amounts directly from the online stores and services.

1 Setting Up



2 Rounding Up



User Evaluation Results

User ratings and feedback based on 6 usability tests

5/5

Usability

+ Users were able to successfully navigate the system end-to-end
+ Intuitive interface with minimal issues

4/5

Trust

+ Transparency about donations destination
+ Visual representation of donations made users more inclined to give again

Quick & Convenient

+ Average completion of process in 4 minutes
+ Seamless, direct integration with online platforms
+ Automated donations encourage more consistency

Moving Forward

+ More emphasis on conveying trust
+ Clearer instructions throughout the process
+ Implementation on additional online platforms
